## PROJECTS

### Tag Based Image Search By Social Reranking

The project aims to improve tag-based image retrieval by re-ranking search results based on visual content, semantic relevance, and social cues. It leverages user-contributed tags and social activity to enhance the relevance and diversity of retrieved images.

### Online Food Ordering System

The main objectives for developing "Online Food Ordering System". The restaurant owners can view and update the order status as New orders, Confirmed orders, Order picked up, Delivery orders.
