CERTIFICATIONS

- Completed Mysql and Php course from winways Informatics Private Limited
- Completed Crash Course in Python in coursera
- Completed Sql for Data Science in Great Learning

PROJECTS

Tag Based Image Search By Social Reranking

- Enhancing tag-based image retrieval involves re-ranking search results through visual content analysis, semantic relevance, and social cues. Deep learning models assess visual similarity, while NLP techniques ensure semantic alignment, and social metrics boost diversity. This combined strategy offers more accurate, diverse, and user-focused search outcomes.

Online Food Ordering System(FoodCave)

- Online Food Ordering System(FoodCave) is to streamline the food ordering process for both customers and restaurant owners. Restaurant owners can efficiently manage and update order statuses, including New Orders, Confirmed Orders, Order Picked Up, and Delivered Orders. This system enhances order tracking, improves customer satisfaction, and optimizes restaurant operations.
